

Commerce intelligence you can defend.

A privacy-separated, bilingual system for turning source-specific commerce signals into tested decisions.

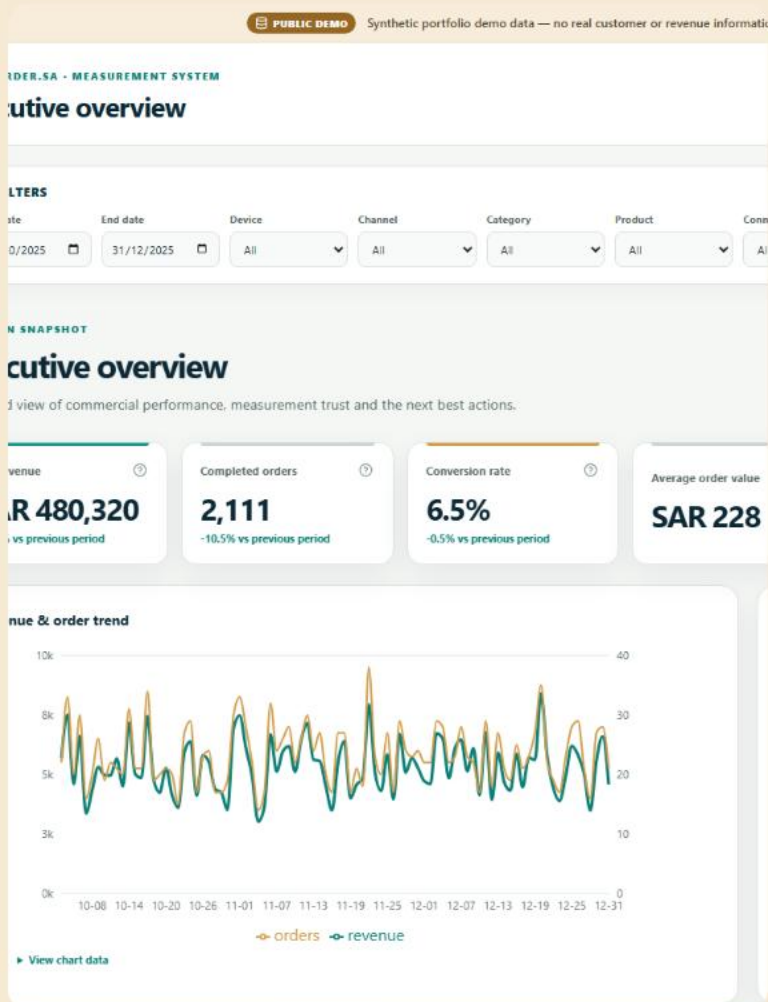

9 DASHBOARD ROUTES

ENGLISH + AR/RTL

Omar Ba Jamel

Define ownership before calculating.

COMMERCE

Completed orders, revenue, refunds and cost

GA4

Sessions, funnel behavior and tracked purchases

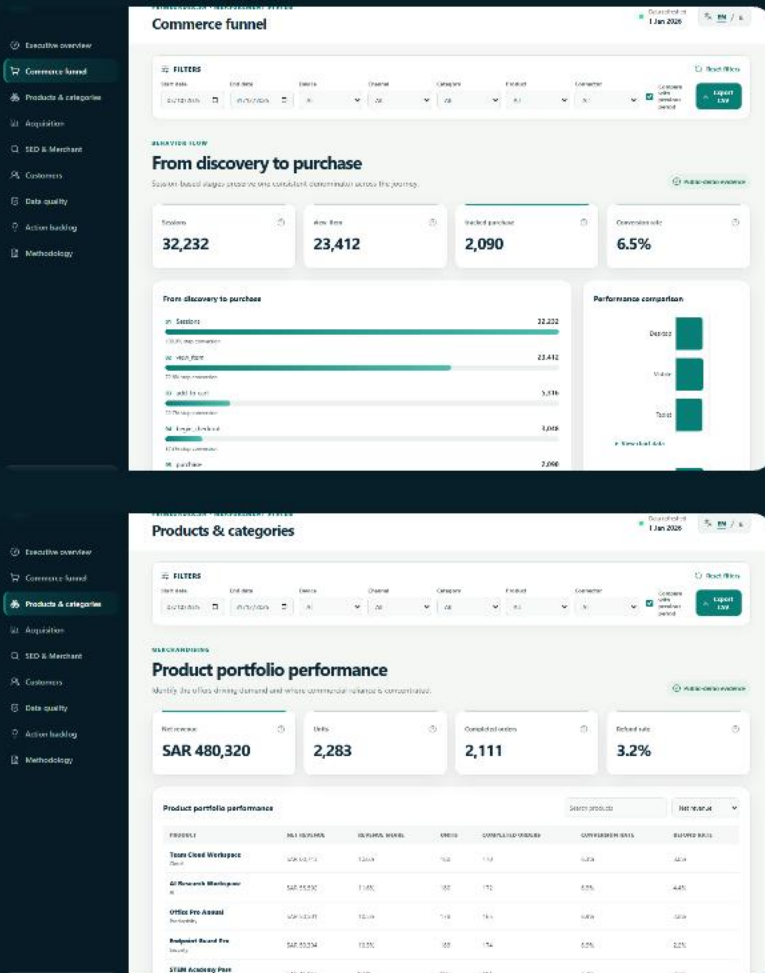

DIAGNOSTIC SOURCES

Ads, search, merchant health and Clarity

The dashboard shows variance and uncertainty - it does not hide them.

One business. Distinct measurement responsibilities.

Connect event quality to product decisions.

365

days of deterministic synthetic evidence

11

specified ecommerce events

12

products with category reconciliation

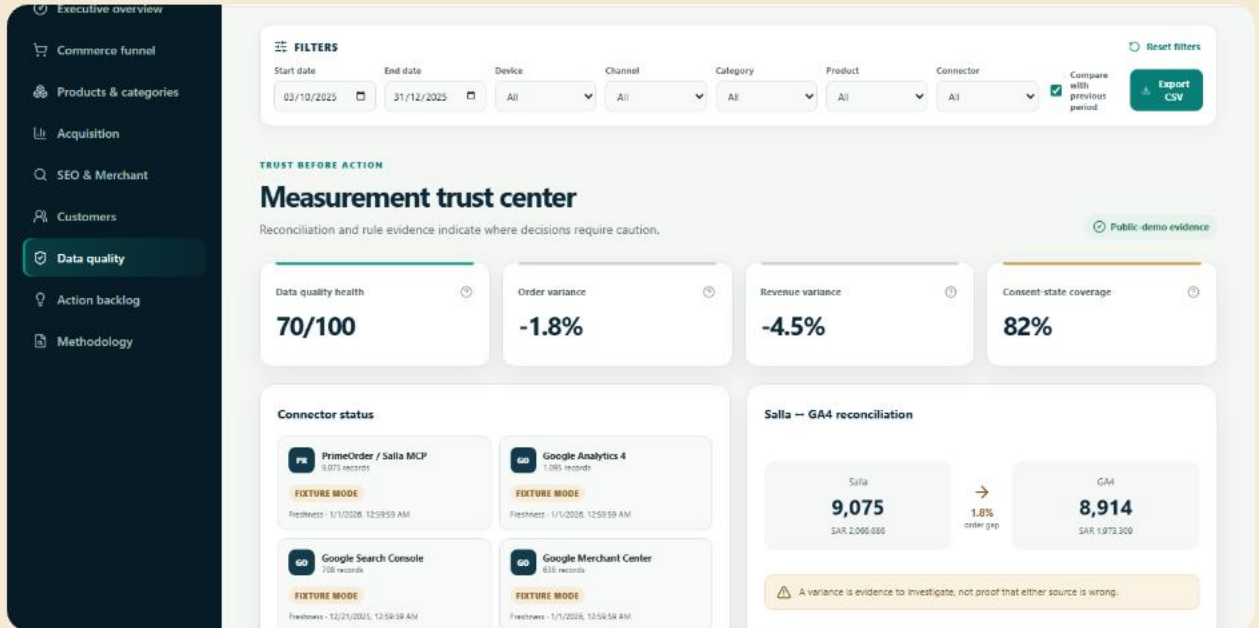

Reproducible by design

Fixed seed 20250301 keeps analysis, tests and screenshots aligned across the public release.

Funnel evidence only becomes useful when its tracking contract is testable.

Make uncertainty visible.

Quality, reconciliation and consent are part of the product - not appendix work.

Ship evidence, not uplift claims.

Every headline below was executed against the release candidate.
